

Private Label Group

Solar Operated

Our manufacturing partner has 992 Solar Panels across two buildings which generate 438,000kwh of electricity each year – which is more than they consume. This is equivalent to over 342 tons of Carbon Dioxide, or the CO₂ emissions from the consumption of 132,216 litres of fuel in our cars, or the carbon sequestered by 380 acres of Forest in 1 year.

LED Lighting throughout the entire factory and office

Recycle Centre

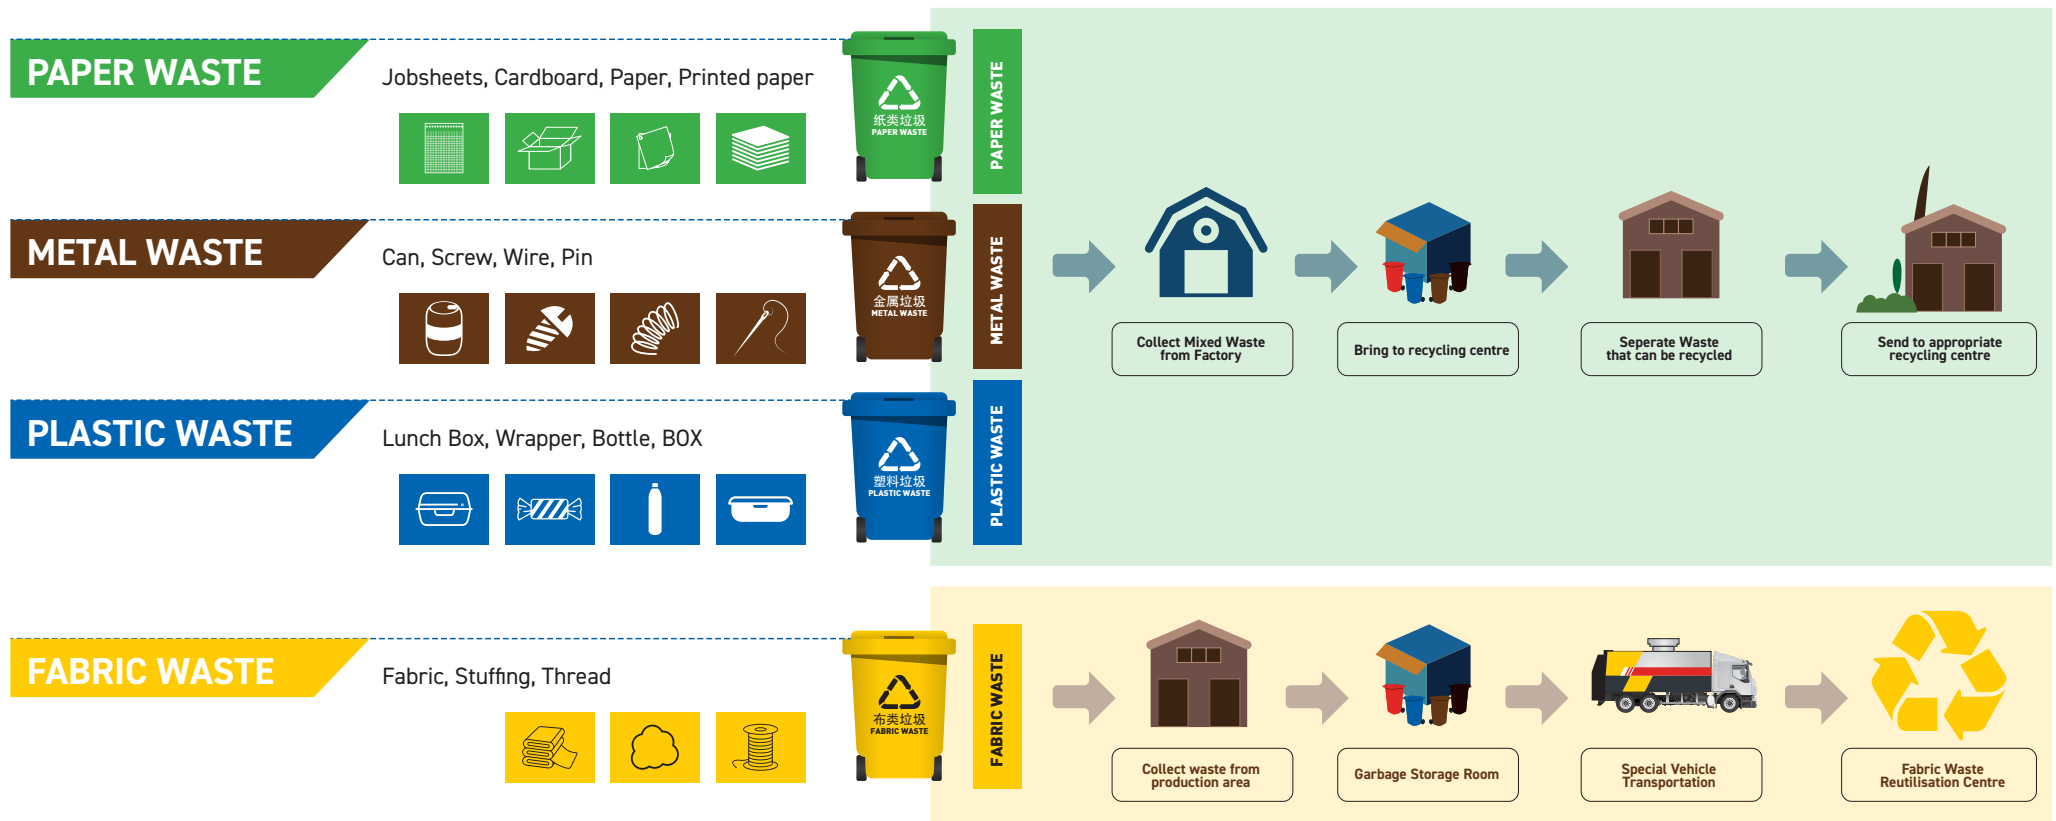

COMPANY PROCESS WASTE

WE WORK TOGETHER TO BE ENVIRONMENTAL GUARDIANS.

WASTE CLASSIFICATION | ENVIRONMENTAL PROTECTION

ENVIRONMENTAL PROTECTION
EVERYONE'S RESPONSIBILITY

WASTE RECYCLING RESOURCE SAVING

FOOD WASTE

Fruit and vegetables, Fish Product, Cooked Meat, Left over Food

FOOD WASTE

GENERAL WASTE

Tools, Packaging, Tissue paper, Plastic Bag

GENERAL WASTE

MIXED WASTE

Job sheets, Cardboard, paper, Fabric, stuffing, Thread

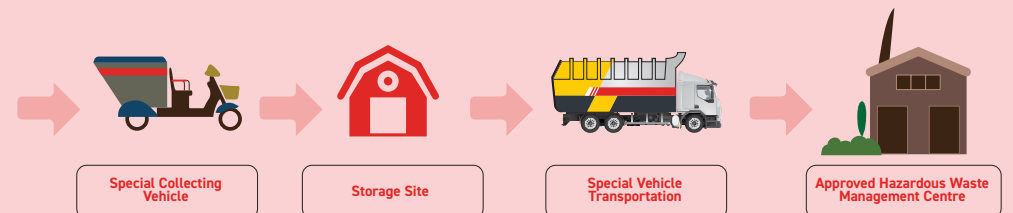

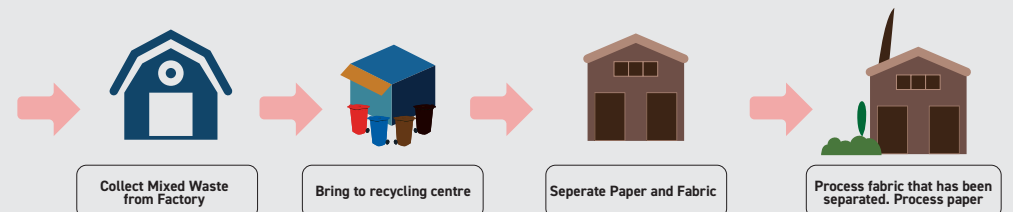

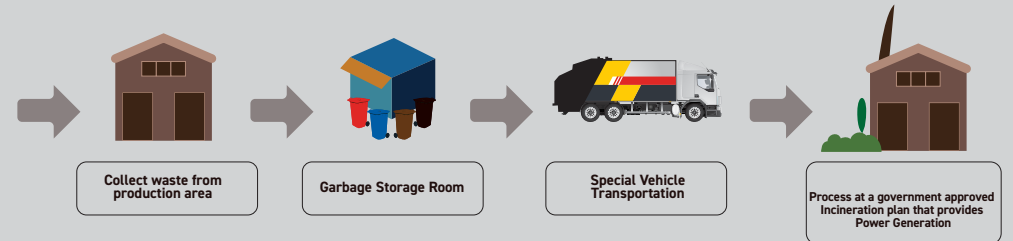

MIXED WASTE

HAZARDOUS WASTE

Batteries, Tubes, Paint Cans, Expired-Medicine, Electronic Products, Pesticide

HAZARDOUS WASTE

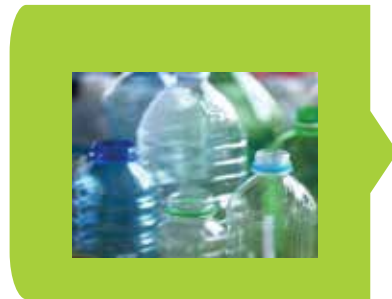

Private Label is committed to a sustainable future.

- Sustainable Fabrics range available from September 2021 with 18 fabrics available
- New fabrics developed for all categories
- Knit Training fabrics all with Moisture Wicking and Anti-Microbial Treatment
- Woven Outerwear fabrics with increased waterproof ratings
- The shift to a sustainable fabric range will remove more than **12 million water bottles** from landfill each year
- Globally trusted and recognised partners and trademarks

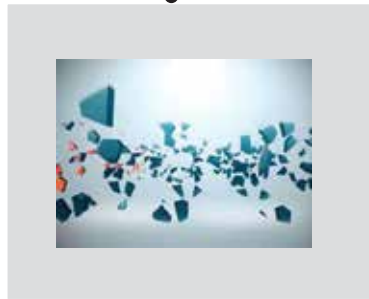

Recycle Polyester by Chip Spinning Method

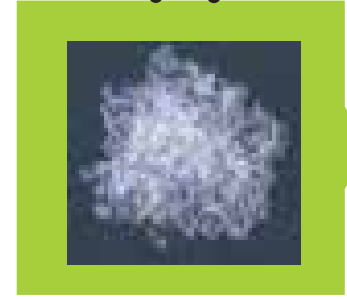

Physical Method

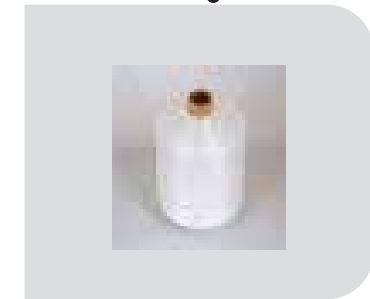

Used Plastic Bottles

Fragment

Recycled Chips

Recycled Fibers

Filtering and Melting

Melting and Spinning

Sorting and Crushing

REPREVE®

BOTTLE RECYCLING PROCESS

RECYCLED BOTTLES
Post-consumer bottles are collected

FLAKE
Bottles are washed and chopped into flake

REPREVE RESIN
Bottle flake is melted and formed into resin

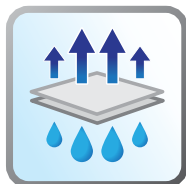

REPREVE RECYCLED FIBER
REPREVE resin is melted and made into REPREVE yarn.
